Ruth Murray-Webster : A Short Guide to Facilitating Risk Management: Engaging People to Identify, Own and Manage Risk (Short Guides to Business Risk) before purchasing it in order to gauge whether or not it would be worth my time, and all praised A Short Guide to Facilitating Risk Management: Engaging People to Identify, Own and Manage Risk (Short Guides to Business Risk):

1 of 1 people found the following review helpful. Short and sweetBy Christine AykacAs described in the foreword, short and get to the point facilitation book! Recommend everyone, who is interested in risk and facilitation techniques.

A Short Guide to Facilitating Risk Management is for all those who need to make sound decisions in important but risky situations; people who work with groups to identify, prioritize and respond to risks, and who wish to deliver value. The authors provide readable and practical advice in terms of avoiding pitfalls, understanding risk management and the role of facilitator. They include guidance for running workshops, and working with small groups and individuals.

'Risk meetings don't have to be boring: A Short Guide to Facilitating Risk Management is the book that risk managers have been waiting for. It provides practical guidance on facilitating risk workshops, and making risk management happen outside of the workshop setting as well. Dotted throughout with cartoons, the emphasis is on practical guidance for getting things done without suffocating those poor souls who have to attend risk reviews. The book provides a clear introduction to tackling risk (including opportunities) in a fun, professional way, with the aim of gaining consensus. It's pragmatic and practical, with real-life examples to show how risk management can become ingrained in the day-to-day management of initiatives in your organisation.' - Elizabeth Harrin, author of Project Management in the Real World and Head of IT Programme Delivery, Spire Healthcare 'The book makes a compelling case for the role of a risk management facilitator, to ease the operation of risk management processes by enthusing and engaging people, and by maintaining continued ownership and accountability until the risks have been closed.' John Greenwood '...There are a number of useful tools and techniques in the book and the accompanying website which could really benefit workshop facilitators...I found the "tried and tested tips" section to be the most useful, where the writers share their extensive knowledge and experience with the reader. Overall, the book was really thought-provoking, particularly the argument for keeping the assessment of risk impact separate from the assessment of probability.' Mark Braham, MCQI CQP, Quality Assurance Manager, the AA '...The authors draw on their considerable experience of running risk workshops, and offer some really good advice, especially in the section dealing with pitfalls...The book is written in a breezy, chatty and conversational style...' Health and Safety at Work Magazine About the Author Dr Penny Pullan is Director of Making Projects Work. Penny is a highly-qualified project manager, facilitator and trainer, with a broad experience both inside multinational companies and as an external consultant. Penny is experienced in facilitating risk workshops and equipping others to do so. See www.makingprojectswork.co.uk Ruth Murray-Webster is Director of Lucidus Consulting Limited.
