**Saskia Sassen : Cities in a World Economy: Volume 4 (Sociology for a New Century Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cities in a World Economy: Volume 4 (Sociology for a New Century Series):

Hotze Sassen has extensively updated the book to include both new 'nodes' in her world cities project, such as Istanbul, and to cover some of the effects of the global financial crisis. She summarizes the work of her career in more of a 'textbook' format

than her academic writing. Unfortunately, while her journal articles are clearly written, *Cities in a World Economy* ends up feeling very repetitive, as she continually makes the same points again and again as she tries to 'dumb down' her work. The end result is that she makes a lot of very similar sounding statements about her work and the theory behind it. She may have come to the conclusions from a lot of hard work, but it ends up coming out the same. This book is good if you only are using it as a reference (she cites a rich variety of research), or assigning a chapter or two to get a 'sense' of the global cities idea to a class, but it isn't a good book to read in its entirety. It's less specific than her actual research, and the writing is much less clear. 0 of 0 people found the following review helpful. Four Stars By Craig Barham Satisfied 1 of 2 people found the following review helpful. Three Stars By erik Castillo informative book, but is difficult to understand right away.

The Fourth Edition of *Cities in a World Economy* shows how certain characteristics of flows of money, information, and people have led to the emergence of a new social formation: global cities, new types of migrations, financial crises, environmental catastrophes, and the multiplication of communication technologies. These developments give new meaning to such fixtures of urban sociology as the centrality of place and the importance of geography in our social world.

"The third edition of the book tries to show how certain characteristics of our turn-of-the-millennium flows of money, information, and people have led to the emergence of new social formation global cities. These developments give new meaning to such fixtures of urban sociology as the centrality of place and the importance of geography in the social world." -- APADE "The third edition of the book tries to show how certain characteristics of our turn-of-the-millennium flows of money, information, and people have led to the emergence of new social formation global cities.
