Danny Myers : Construction Economics: A New Approach before purchasing it in order to gage whether or not it would be worth my time, and all praised Construction Economics: A New Approach:

Construction Economics provides students with the principles underlying the relationship between economic theory and the construction industry. Its new approach specifically examines the problems of securing sustainable construction. The new edition has been fully revised to provide an overview of the economy and construction markets since the global financial crisis. As such it examines the challenges of changing government policy, adapting to

climate change, adopting BIM, and reducing costs. A new introduction along with new readings, data, examples, glossary items, government strategies, and references, revises this established core text and brings it up to the historic EU referendum. As with previous editions, it retains a tried and tested format: a clear and user-friendly style use of a second colour for emphasis regular summaries of key points a glossary of construction economic extensive use of tables and figures extracts from Construction Management and Economics reviews of useful websites. This invaluable textbook is essential reading across a wide range of disciplines from construction management and civil engineering to architecture, property and surveying.

About the Author Danny Myers is an experienced lecturer and author from the Department of Construction and Property at the University of the West of England, and the Department of Architecture and Civil Engineering at the University of Bath.
