From Palgrave Macmillan : Global Sustainability as a Business Imperative (Global Sustainability Through Business) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Global Sustainability as a Business Imperative (Global Sustainability Through Business):

This first volume in the series addresses the pressing need to align business practices with the requirements of a sustainable world. Delivering new models for conducting business, implications of undertaking new approaches, and ways businesses are transforming and being transformed by their environments.

"This work offers useful coverage of an emerging paradigm in which successful organizations are committing to a social contract emphasizing global sustainability while also providing a positive return to all their stakeholders. Recommended." - Choice
