From Springer : Globalization and Regional Dynamics: East Asia and the European Union from the Japanese and the German Perspective before purchasing it in order to gage whether or not it would be worth my time, and all praised Globalization and Regional Dynamics: East Asia and the European Union from the Japanese and the German Perspective:

The writings by Japanese and German economists presented here originated against the backdrop of ongoing globalization processes and notable fluctuations in regional economic dynamics observable at the same time, primarily in the East and South East Asian area. They provided the occasion for these writers to come to terms with globalization processes, and in particular with the stabilizing and destabilizing elements at work in them. This is the basis for their investigation of the options provided by economics and economic policy for stabilizing an ever more tightly interwoven world economy. The regional focal points of the contributions are the East Asian realm and the European Union, and the points of view are in every case both from the Japanese and the German side. Questions of international competition and mechanisms of the spread of the crisis in the wake of globalization processes lie at the centre of the analyses by Hisashi Watanabe and Willy Kraus. Hisashi Watanabe focusses on the relationship, an especially important one from the Japanese perspective, between Japan and South Korea and takes up the problem of South Korea's demand that Japan should energetically promote its own transition to a service-sector-oriented society and withdraw from certain areas of manufacturing. This, it is argued, will grant Japan's Asian neighbours better chances for development and make a positive contribution to the economic stabilization of the region.

From the Back Cover This book contains a collection of papers by Japanese and German authors dealing with the ongoing globalization process and notable fluctuations in the regional economic development in East Asia. The contributions discuss the stabilizing and destabilizing elements of the globalization process. The authors investigate the different options for economic policy to stabilize an ever more tightly interwoven world economy. In the center of the discussion are developments in East Asia and the European Union.
