From Routledge : Green Budget Reform: An International Casebook of Leading Practices before purchasing it in order to gauge whether or not it would be worth my time, and all praised Green Budget Reform: An International Casebook of Leading Practices:

This volume explores 25 case studies of fiscal measures that have been adopted successfully by governments in North

America and Europe to reduce environmental degradation. Each study lays out the implementation issues and problems faced, and compares the effectiveness of the measure against its expectations. The political implications are also discussed, and the text draws on common themes and lessons to be gained from the measures so far. The volume is divided into sections on energy, agriculture, air and water pollution, and waste management.
