**Jack Uldrich : Green Investing: A Guide to Making Money through Environment Friendly Stocks** before purchasing it in order to gage whether or not it would be worth my time, and all praised Green Investing: A Guide to Making Money through Environment Friendly Stocks:

0 of 0 people found the following review helpful. Good things come in small packagesBy Junn13I ordered the book as a resource/reference for buying "Green" stocks.When the book arrived I was rather surprised at the size of it but whatit lacks in size it more than makes up for in information. The book is an easy read so if you plan on buying Green stocks now or in the future the book is a great source of information on this emerging market. One of the chapters that I found most interesting was on ethanol fuel. The book gave me a better understanding how the product is made and some of the drawbacks in getting the product to the marketplace.The book also has a list of small and large companies that are

developing Green products or already have Green products in the marketplace. At the time of this review the list is dated but, of these companies some have products that are beginning to show signs that they can compete with fossil fuel and coal.0 of 0 people found the following review helpful. Bit dated but goodBy ChadThe book is more useful to help order your thinking on the process of which companies will be the best.1 of 2 people found the following review helpful. Not just for green!By AriaThis book on investing is so different from others I've read - in the best of ways. The author gives valuable information on how to select companies that are applicable to investments of any kind - not just green companies. I got more than I looked for when I bought this.

A Simon Schuster eBook. Simon Schuster has a great book for every reader.

About the AuthorJack Uldrich is the author of Investing in Nanotechnology, Jump the Curve, and the bestselling The Next Big Thing Is Really Small. He is president of the Nanoveritas Group, a consultancy in nanotechnology. He is a contributor to The Motley Fool's website, [www.fool.com](http://www.fool.com).
