**Jeanine Davis, W. Scott Persons : Growing and Marketing Ginseng, Goldenseal and other Woodland Medicinals** before purchasing it in order to gage whether or not it would be worth my time, and all praised Growing and Marketing Ginseng, Goldenseal and other Woodland Medicinals:

3 of 3 people found the following review helpful. This book is everything you will ever need to know ...By TammyThis book is everything you will ever need to know about growing ginseng and all herbs that grow in the woods from buying seeds to selling your crops. They even have color pictures. I really am impressed! This book is worth more than its cost.5 of 6 people found the following review helpful. The best practical book for woodland agriculture under the forest I have seenBy T. doyleA very complete book for anyone interested in woodland agriculture. I bought this for learning more about growing Ginseng and Goldenseal. These parts are well written and include site selection, good horticultural tips, university studies, economic analysis and stories from regular people who have done it for years. I also found some of the other woodland crops to be of interest and may grow them on my

land. By the way my ginseng and goldenseal are doing great so far!!! Follow up 9-29-16. After the first season we have 300 Ginseng plants and several goldenseal. I just planted another 4000 more ginseng in a wild simulated setting. I also did some ramps this year. 2 of 2 people found the following review helpful. comprehensive! By Ann Onymnus This is a rather thick book, very complete on the subject. It will teach you how to set up, establish, develop or operate a ginseng growing and harvesting business. This is a guide to a business, not a handy-dandy pamphlet for the opportunist.

Not all saleable crops are dependent on access to greenhouses or sun-drenched, arable land. Shade-loving medicinal herbs can be successfully cultivated in a forest garden for personal use or as small-scale cash crops. *Growing and Marketing Ginseng, Goldenseal and other Woodland Medicinals* is a complete guide to these increasingly popular botanicals, aimed at aspiring and experienced growers alike. In this fully revised and updated edition, authors Jeanine Davis and W. Scott Persons show how more than a dozen sought-after native species can generate a greater profit on a rugged, otherwise idle woodlot than just about any other legal crop on an equal area of cleared land. With little capital investment but plenty of sweat equity, patience, and common sense, small landowners can preserve and enhance their treed space while simultaneously earning supplemental income. Learn how to establish, grow, harvest, and market: Popular medicinal roots such as ginseng, goldenseal, and black cohosh; Other commonly used botanicals including bloodroot, false unicorn, and mayapple The nutritious wild food, ramps, and the valuable ornamental galax. Packed with budget information, extensive references, and personal stories of successful growers, this invaluable resource will excite and inspire everyone from the home gardener to the full-time farmer. Jeanine Davis is an associate professor and extension specialist with North Carolina State University. Her focus is helping farmers diversify into new crops and organic agriculture. W. Scott Persons is the author of *American Ginseng: Green Gold* and an expert in growing and marketing wild-simulated and woods-cultivated ginseng.

I have discussed the cultivation of North American woodland plants with both Jeanine and Scott for many years. This new book is a summary of all those conversations and more, with notes on the history and traditions of these plants and with information that ranges from soil conditions to harvest, and from control of critters to dealing with poachers. --Michael McGuffin, American Herbal Products Association Jeanine and Scott have produced a grower's guide worth its weight in "Green Gold." --Richo Cech, author of *Growing At-Risk Medicinal Herbs* To discover a book with as much solid, researched advice on cultivation and marketing of botanicals is pure joy in an industry where most participants keep this knowledge as a trade secret. There are no two researchers who have as much experience with these crops, and any grower who wants to actually generate a profit from his land will benefit tremendously from reading it. --Maureen Rogers, Herb Growing Marketing Network Jeanine and Scott have produced a grower's guide worth its weight in "Green Gold." --Richo Cech, author of *Growing At-Risk Medicinal Herbs* I have discussed the cultivation of North American woodland plants with both Jeanine and Scott for many years. This new book is a summary of all those conversations and more, with notes on the history and traditions of these plants and with information that ranges from soil conditions to harvest, and from control of critters to dealing with poachers. --Michael McGuffin, American Herbal Products Association From the Back Cover THE MOST COMPREHENSIVE, TRULY PRACTICAL GUIDE TO THE CULTIVATION OF WOODLAND BOTANICALS the definitive guide to growing our shade-loving native medicinal plants for fun and profit. ---James B. McGraw, Eberly Professor of Biology, Department of Biology, West Virginia University Scott Persons and Jeanine Davis have written the only accurate and comprehensive grower's guide to woodland cultivation of American Ginseng and other forest medicinal and culinary herbs ---Bob Beyfuss, American Ginseng Specialist, Cornell University Cooperative Extension (retired) Now fully revised and updated, *Growing and Marketing Ginseng, Goldenseal and other Woodland Medicinals* is the authoritative source for practical information on the cultivation of more than a dozen sought-after shade-loving native species. Learn how to establish, grow, harvest and market: Popular medicinal roots such as ginseng, goldenseal and black cohosh Other commonly used botanicals including bloodroot, false unicorn and mayapple The nutritious wild food, ramps, and the valuable ornamental, galax. This comprehensive guide enables small landowners to preserve and enhance their treed space while simultaneously earning supplemental income. Packed with budgeting information, proven best practices, extensive references, personal success stories and an all-new section for the home shade gardener, this invaluable resource will excite and inspire aspiring and experienced growers alike. the most significant, must-have reference on growing ginseng, goldenseal, and other woodland medicinal plants. ---Steven Foster, Senior author, *Peterson Field Guide to Medicinal Plants* an instant classic in the fields of medicinal plant horticulture, sustainable agriculture, and agroforestry. ---Eric P. Burkhart, PhD., Program Director, Plant Science, Shaver's Creek Environmental Center, The Pennsylvania State University Jeanine Davis is an associate professor and extension specialist with NC State University. Her focus is helping farmers diversify into medicinal herbs, new crops and organic agriculture. W. Scott Persons is the author of *American Ginseng: Green Gold* and an expert in growing and marketing wild-simulated and woods-cultivated ginseng.
