**From Chandos Publishing : South Korea: Challenging Globalisation and the Post-Crisis Reforms (Chandos Asian Studies Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised South Korea: Challenging Globalisation and the Post-Crisis Reforms (Chandos Asian Studies Series):

South Korea: Challenging globalisation and the post-crisis reforms examines the major economic issues flowing from the Korean financial crisis of 1997 and covers such issues as industrial relations, macroeconomic sectors, the role of administrations, and corporates' globalisation process by over-expanded foreign direct investment. The chapters contained in this book are written by a wide variety of contributors, including a former government technocrat, president's advisory board member, plus leading Korean economy specialists. Includes empirical surveys from the leading academics in Korea. Exclusively research methodology on each topic. First attempt to explain limited but historically important period economic policy.

About the Author Young-Chan Kim is Senior Lecturer of International Business and Economics at Greenwich University. Doo-Jin Kim is Professor of Political Economy and Korea Studies at Frankfurt University. Young Jun Kim is Professor at the Graduate School of National Intelligence, Korea.
