From OUP Oxford : The Oxford Handbook of Regulation (Oxford Handbooks) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Oxford Handbook of Regulation (Oxford Handbooks):

0 of 0 people found the following review helpful. How to regulate the regulatorsBy Vincent WWExcellent book written by a plethora of experts who are very knowledgeable about what it takes in regulating the various economic sectors1 of 1 people found the following review helpful. I recommend this bookBy Roman HerbstThis is a good introduction to regulation and the various views around how it applies and can apply to policy situations. The strength of the book is that it is written by a variety of authors, all knowledgeable in their respective fields. A weakness, however, is the flip side of the previous statement: some writers are better at expressing themselves and their ideas than other contributors.Overall though, I recommend this book0 of 0 people found the following review helpful. I am a

great fan of Prof Baldwin's writings over the years and ...By CustomerI am a great fan of Prof Baldwin's writings over the years and this is another important landmark in the academic study of regulation and regulators.

Regulation is often thought of as an activity that restricts behaviour and prevents the occurrence of certain undesirable activities, but the influence of regulation can also be enabling or facilitative, as when a market could potentially be chaotic if uncontrolled. This Handbook provides a clear and authoritative discussion of the major trends and issues in regulation over the last thirty years, together with an outline of prospective developments. It brings together contributions from leading scholars from a range of disciplines and countries. Each chapter offers a broad overview of key current issues and provides an analysis of different perspectives on those issues. Experiences in different jurisdictions and insights from various disciplines are drawn upon, and particular attention is paid to the challenges that are encountered when specific approaches are applied in practice. Contributors develop their own distinctive arguments relating to the central issues in regulation and apply scholarly rigour and clear writing to matters of high policy-relevance. The essays are original, accessible, and agenda-setting, and the Handbook will be essential reading both to students and researchers and to with regulatory and regulated professionals.

...this Handbook is exactly what it says on the tin: provides high quality state of the art reviews of the main areas of work on regulation. * Michael Moran, University of Manchester Business School *About the Author Robert Baldwin is a Professor of Law at the London School of Economics and Political Science. He has published extensively on regulation, has wide consultative experience in regulation and is the Director of the LSE Short Course on Regulation. Martin Cave is Visiting Professor at Imperial College Business School. He was a member of the U.K. Competition Commission from 1996-2002. He has authored numerous works on economic regulation, and has very extensive experience of advising regulatory agencies, international institutions, and governments. Martin Lodge is Reader in Political Science and Public Policy at the London School of Economics and Political Science. His research and teaching interests are in the comparative study of Executive Government and Regulation.
