**Nir Kshetri : The Rapidly Transforming Chinese High-Technology Industry and Market: Institutions, Ingredients, Mechanisms and Modus Operandi (Chandos Asian Studies Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Rapidly Transforming Chinese High-Technology

Industry and Market: Institutions, Ingredients, Mechanisms and Modus Operandi (Chandos Asian Studies Series):

A number of indicators point to rapid and extraordinary shifts in the Chinese high-technology landscape. This book places special emphasis on ultra-modern and crucial ICT industries in which Chinese players possess a competitive advantage. It analyzes how formal and informal institutions and associated feedback mechanisms have influenced the Chinese high-technology industry and market. Finally, the book deeply investigates the nature, sources and quality of key ingredients related to the Chinese high-technology industry and provides an insight into the status and locus of this industry. Draws on multiple theoretical lenses for studying the Chinese high technology industry and markets Focuses on a range of technology industries Special emphasis is placed on ultra-modern and crucial ICT industries in which Chinese players possess a competitive advantage

hellip;useful reading for both economic and political analysis., Journal of Contemporary Asia About the Author Dr Nir Kshetri is an Assistant Professor at Bryan School of Business and Economics, The University of North Carolina-Greensboro.
