Jean-Paul Rodrigue, Theo Notteboom, Jon Shaw : The SAGE Handbook of Transport Studies (Sage Handbooks) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The SAGE Handbook of Transport Studies (Sage Handbooks):

The SAGE Handbook of Transport Studies is an authoritative survey of contemporary transportation systems in view of economic, social, technical and environmental challenges. Incorporating an extensive range of approaches - from modes, terminals, planning and policy to more recent developments related to supply chain management, information systems and sustainability/ecology - the work provides a cohesive and extensive overview of the discipline. Authored by international experts in their field, each individual chapter bridges a broad range of conceptual, theoretical and

geographical perspectives, and the handbook is divided into six sections: Transport in the Global World. Transport in Regions and Localities. Transport, Economy and Society. Transport Policy. Transport Networks and Models. Transport and the Environment. This Handbook will be an indispensable resource for academics, planners, and policy-makers.

The tone and content of this book provides an excellent foundation for informed debate... undoubtedly provides a cohesive account of the current state of play in academia.--Robin Lovelace The tone and content of this book provides an excellent foundation for informed debate... undoubtedly provides a cohesive account of the current state of play in academia. (Robin Lovelace)About the AuthorDr Jean-Paul Rodrigue is Professor of Geography at Hofstra University, New York.Theo Notteboom is Foreign Expert/Professor at the Transportation Management College of Dalian Maritime University in China.
